

Maria Womack

University of South Florida
 Department of Physics
 4202 E. Fowler Ave
 Tampa, FL 33610
 Womack @ usf.edu

Education

Ph.D. Physics, Arizona State University, 1991
 B.S. Physics, Florida State University, 1985

Professional Experience**Research Professor, Aug 2015 – present**

Department of Physics, University of South Florida, Tampa, FL

Lead externally-funded research program in astrophysics; supervise graduate and undergraduate research students, contribute to STEM education efforts for under-represented groups, assist development of online courses and curriculum; establish and develop new science collaborations across the university and the state. Director of USF physics bridge-to-doctorate program.

Expert consultant, Feb 2016 – Jun 2016**Program Director, 2011 - 2015 (intergovernmental personnel assignment)****Division of Astronomical Sciences**

National Science Foundation, Arlington, VA

Managed annual budget of \$20 million; lead program director for the Stellar Astronomy and Astrophysics (Nov 2011-Jan 2014), and the Planetary Astronomy (Sep 2013 – Jan 2015) grant programs. I created and helped develop the new NSF-NASA partnership for observational extrasolar planet research: NN-EXPLORE; I reorganized the stellar astronomy and astrophysics and planetary astronomy programs, including establishing and assessing the NSF extrasolar planet portfolio. Other highlights include:

- Strategic planning and program development;
- Identified and supported emerging scientific trends and potentially transformative research and scholarship;
- Coordinated, scheduled and conducted review panels, identified and secured topical experts and made proposal assignments for merit review;
- Made funding recommendations based on merit review and budget allocations;
- Provided annual review, evaluation and oversight of funded programs;
- Conducted merit review and made well-justified funding recommendations for over 700 proposals; conveyed results to PIs;
- Worked with colleagues in Divisions of Physics (PHY), Materials Research (DMR) and Chemistry (CHE) and Office of Multidisciplinary Activities (OMA) of the Math and Physical Sciences (MPS) Directorate and the Geosciences Directorate (GEO) to secure joint funding for meritorious proposals;
- Point-of-contact for NSF, and the inter-agency (NSF, NASA and DOE) coordinator

- for Congressionally-appointed Astronomy and Astrophysics Advisory Committee;
- Worked with colleagues to prepare and present information on NSF's extrasolar planet research initiatives to staffers of U.S. House of Representatives Science, Space and Technology Committee, Subcommittee on Research;
- Worked with colleagues to prepare follow-up testimony for NSF's extrasolar planet research initiatives, for the House Committee on Science, Space and Technology;
- Worked with colleagues to review and comment on draft testimony from the Department of the Air Force and the President's Science Advisor for a hearing on Threats from Space Objects, which was presented before the House Committee on Science, Space and Technology.

College Director of Assessment for Student Learning, 2008-2011

Director of the SCSU Observatory, 2004 – 2015

Interim Director for SCSU Planetarium, 2002

St Cloud State University, St. Cloud, MN

Worked with the Dean of the College of Science and Engineering, faculty and students to achieve research, teaching and assessment goals of the university; managed budgets and supervised student employees. Managed Observatory with two moderate-sized telescopes, spectrometer and imaging CCD, developed and conducted planetarium shows for classes and the public.

Professor of Physics and Astronomy, 2005 – Aug 2015

Associate Professor of Physics and Astronomy, 1999-2005, tenured 2000

Assistant Professor of Physics and Astronomy, 1997-1999

Department of Physics and Astronomy, St. Cloud State University, St. Cloud, Minnesota
 Taught all levels of undergraduate physics and astronomy courses, including online format; conducted NSF- and NASA- funded research programs, including supervising 43 undergraduate researchers.

Research Scientist, 2007-2008

University of Central Florida, Department of Physics (sabbatical)

Initiated research program on extrasolar planet spectroscopy with Dr. J. Harrington.

Assistant Professor of Physics, 1994-1997

Pennsylvania State University at Erie, Division of Science

NASA-funded Planetary Science tenure-track faculty position: comet impact on Jupiter; conducted NSF-funded research programs with 8 undergraduate researchers.

Adjunct Associate Professor, 1994-1998

Visiting Professor, 1995-1996

Postdoctoral Research Associate, 1992-1994

Northern Arizona University, Department of Physics and Astronomy

Planetary science research, Native American astronomy outreach, research advising and mentoring for 7 undergraduate researchers, taught intro astronomy laboratory courses.

Postdoctoral Research Associate, 1991-1992

Arizona State University, Department of Chemistry.

Search for deuterated methane emission in interstellar molecular clouds.

Grant Support and Funding History

- 2016-2019: **PI, NSF Planetary Astronomy**. This grant and two REU Supplements support observation, analysis and modeling of carbon monoxide emission in comets. Funding also supports supervision of graduate and undergraduate research projects at USF, including participation of women and underrepresented minorities, an industrial practicum for a doctoral student, and establishes new science collaborations across the university and the state.
- 2010-2015: **PI, NSF Planetary Astronomy**. This grant supported analysis and modeling of measured carbon monoxide emission in comets, including supervision of graduate and undergraduate research projects at SCSU.
- 2001-2005: **PI, NSF Planetary Astronomy**. Observational and analytical studies of simple organic molecules in comets. The observations were conducted at national and international mm/sub-mm facilities as well as at the optical observatory at the SCSU campus. Funding also supported new imaging and spectroscopic equipment purchases for the SCSU Observatory and student wages.
- 2001-2004: **PI, NASA Planetary Astronomy**. Reduce and analyze data for two comets.
- 1999-2001: **Co-I, Toyota Tapestry Grant**, supported equipment purchases and stipends for Minnesota high school teachers to learn how to use telescope equipment that their schools already owned; helped teachers learn research skills and make contributions to the American Association of Variable Star Observers.
- 1996-2002: **PI, NSF Faculty Early Career Development Program (CAREER)**. Grant funded comprehensive research program that was integrated with a strong educational component. The grant supported numerous observing trips for comet Hale-Bopp and many other bright comets at mm/sub-mm telescopes in Arizona and Hawaii. It also funded all equipment needed (including telescope, CCD camera and computers) to establish SCSU student-run observatory for optical imaging of comets, conducted simultaneously with the radio spectroscopy. It also funded dozens of undergraduate student researchers, including travel to observatories and conferences.
- 1997-1999: **PI, NASA Comet Hale-Bopp Program**. Funded mm-wave spectroscopy of comet Hale-Bopp, reducing and analyzing the data and publishing the results.
- 1998: **PI, Jorge Scientific Corporation Travel Grant**, funded travel to the International Astronomical Union conference at Tenerife Canary Islands so I could present research results on comet Hale-Bopp.
- 1994-1997: I was one of only a few **NASA Planetary Astronomy tenure-track faculty appointees** (the grant was awarded to Penn. State U. at Erie, R. Knacke, PI). This supported my academic year salary, so I could teach physics and astronomy courses and analyze infrared data of Jupiter related to the 1994 impact of comet Shoemaker-Levy 9.
- 1995-1996: **PI, NSF Astronomy**. While still a postdoctoral researcher at NAU, I initiated one of the first observational programs in the U.S. to apply the new technique of millimeter-wavelength spectroscopy in comets. This grant paid for subsequent analyses of these data, publications, and new observations.
- 1992-1996: **Co-I, NASA Origins of Solar Systems Program**. This award supported observation and analysis of molecular emissions from comets and interstellar clouds in order to constrain models of solar system formation.
- 1995-1996: **PI, American Astronomical Society Small Research and Travel grants** to pay for observational research on comet Hale-Bopp.

Telescope access granted at national and international facilities: \$2M+ estimated value (served as PI, unless otherwise stated)

- 2018: NASA Spitzer Infrared Space Telescope (co-I)
- 2016 - 2018: Arizona Radio Observatory Submillimeter Telescope (ARO SMT) 10-m
- 2016-2017: NASA Kepler 2 space observatory (K2 mission)
- 2016: Institut de Radioastronomie Millimetrique (IRAM) 30-m telescope, Spain
- 2016, 2018: Arizona Radio Observatory Kitt Peak 12-m telescope
- 2011: W.M. Keck Optical Observatory 10-m telescope, Hawaii
- 1990-2005: National Radio Astronomy Observatory 12m telescope, Kitt Peak
- 1990-1993: Caltech Submillimeter Observatory 10-m telescope, Hawaii
- 1993-1995: National Undergraduate Research Optical Observatory, Arizona
- 1993-1994: James Clerk Maxwell Submm Telescope, 15-m, Hawaii
- 1988-1990: Kitt Peak National Optical Observatory coude-feed

Teaching and Assessment Experience

While at St. Cloud State, I taught all levels of physics and astronomy courses, including online format. I oversaw all aspects of the astrophysics track of the B.S. physics major, and the B.S. Physics Education major. This included program development and assessment, modernization and reform, course curriculum development, undergraduate-student advising, and mentoring. I also led efforts to enhance undergraduate student facilities (including the observatory and physics major computing lab). Other highlights include:

- Helped develop the Physics Education curriculum to meet the State of Minnesota Board of Teacher Education new licensure requirements for junior and senior high school teacher candidates;
- Led the department through the university-wide general education overhaul, including coordination with statewide transfer curriculum standards;
- Secured final approval of our general education courses and oversight of the early stages of implementation;
- Worked with colleagues to write and publish physics and astronomy laboratory exercise manuals, which raised over \$100,000 for departmental laboratory equipment, supplies and student scholarships for recruitment.

During 2009-2011 I served as an **elected member of the Minnesota Online Academic Services Committee**. Review, develop, and recommend to the Minnesota Online Council guidelines, policies, and/or procedures that will promote strategic curriculum development and technology employment that applies best practices regarding online learning into the design and delivery of courses within the Minnesota State Colleges and Universities system.

I served as the **Director of Student Learning Assessment** for the College of Sciences and Engineering at SCSU for three years. I led monthly meetings with faculty representatives to set goals, document assessment of goals, and kept departments on track for monthly and annual deadlines for accreditation. Other major responsibilities were to:

- Prepare and present annual reports to the Dean of the College summarizing and analyzing all the departments' progress toward meeting the Higher Learning Commission (HLC) goals, identifying successes and concerns in academic programs;
- Lead the College through completion of accreditation process with the HLC;
- Help the College meet annual goals and satisfy requirements for the university in 2010 for the HLC's Academy for Assessment, needed for HLC accreditation.

Significant Educational and Public Outreach

During summers from 1994 – 1998 I was the **Lead instructor and facilitator for “Stargazer” Workshop** at Northern Arizona University. I worked with Navajo astronomers Nancy Maryboy and David Begay and NAU professor Barry Lutz to develop a joint Western-Navajo astronomy curriculum for “Stargazer.” This camp was selected for special recognition by NASA and given the opportunity to fly a piece of student-produced artwork from the Stargazer camp aboard NASA Space Shuttle STS-88 Endeavour flight. I also conducted other astronomical public observing sessions on the Navajo reservations.

During summers 1995 and 1996 I was **Instructor for the NAU/NASA Jupiter Watch** undergraduate research program, which recruited students nationally for research training with the 30-inch National Undergraduate Research Observatory (optical) telescope. I taught students data collection, reduction and analysis techniques using National Optical Astronomy Observatory (NOAO)'s IRAF software.

From 1997 – 2011 I developed and gave dozens of planetarium shows to university students and members of the public, including many public-astronomy nights. In 2002 I was the interim **SCSU Planetarium Director**, during which time I oversaw the operation of the planetarium, including the budget, trained and supervised student employees.

From 2004 - 2015 I was **Director of the SCSU Observatory**, for which I manage the budget, scheduling, operation and maintenance of the on-campus student-run observatory. I also:

- Secured funding from NSF for a \$60,000 upgrade to the observatory with two telescopes, imaging and spectroscopic CCD cameras, filters, and computers;
- Trained students to conduct research with the observatory, and to assist with public observing nights;
- Supervised over 30 paid student research assistants to conduct observations and analyze results using advanced computer techniques

Invited Talks, Presentations and Workshops

2018	NASA SSERVI Workshop, “Carbon in Comets”
2017	NSF CAREER Workshop, USF, keynote speaker
2017	USF CAS NSF Funding Workshop, speaker
2015	NSF Grant Strategies Workshop, USF
2015	University of Central Florida, Dept of Physics, “Carbon monoxide in Comets,” colloquium
2015	University of South Florida, Dept of Physics, “Writing a great research proposal” graduate seminar lecture for USF Bridge program
2014	University of South Florida, Dept of Physics, “Research communities and the craft of proposal writing,” graduate seminar lecture
2013	University of S. Florida, Dept. of Physics, “Proposal writing: Selling your Best

- Idea,” graduate seminar lecture
- 2011 St. Cloud State University, “NSF Funding Opportunities and Tips for Success;”
- 2010 Minnesota State University Moorhead, Department of Physics and Astronomy, “Using Spectra to Probe Cometary Atmospheres,” colloquium
- 2010 Winter Workshop at University of Central Florida: Exoplanets for Planetary Scientists, “Challenges of a Ground-based Search for Water in a Hot Jupiter: HD 209458b,” invited review talk
- 2009 University of South Florida, Department of Physics, “Spectral Clues to the Origin of Organic Molecules in Comets,” colloquium
- 2009 SCSU, “A Guided Tour of Five Exotic Exoplanets,” public lecture
- 2000 Univ. of Toledo Dept. of Physics and Astronomy, “Outbursts in Comets at Large Heliocentric Distances,” colloquium
- 1999 American Astronomical Society meeting (Atlanta), invited session for NSF CAREER Awardees, “Cometary Activity Beyond 4 AU”
- 1999 NRAO Conference: Imaging at Radio through Submillimeter Wavelengths, “On the Fly Imaging of Comet Hale-Bopp,” invited review
- 1999 University of Minnesota Astronomy Dept, “Millimeter-wavelength Observations of Comet Hale-Bopp,” colloquium
- 1999 Asteroids, Comets, and Meteors meeting, Cornell University, “On the Activity of Distant Comets,” invited review
- 1999 Minnesota Optical Society, “Millimeter-wavelength Spectral Imaging of Comets: New Insights into Gas Dynamics”
- 1998 Western Regional NASA Space Grant meeting, "Native American Astronomy Education in the Stargazer Program," invited speaker
- 1996 Panel Discussion on Comet Hyakutake, American Astronomical Society meeting, Madison, WI
- 1995 American Association for Physics Teachers meeting, Spokane, WA, "Carbon Chemistry in Comets," invited review
- 1996 Univ. of Toledo Dept. of Physics and Astronomy, “Observational Constraints to Solar System Formation,” colloquium
- 1995 Pennsylvania State Univ. at Erie, Division of Science, “Millimeter-wavelength Observations of Organic Species in Comets,” colloquium
- 1996 Max Planck Institut fur Astronomie, Bonn, “N₂H⁺ in Quiescent Gas: Evidence for Colliding Clouds,” colloquium
- 1991 Univ. Massachusetts at Amherst, “Interstellar Nitrogen Chemistry as Revealed from Observations of N₂H⁺,” colloquium

Additional Professional Service and Expertise

- Expert consultant for astrophysical issues, 2018 –
- USF CAS Faculty Development Committee, alternate, 2017-2018
- USF Graduate admissions committee, 2017-2018
- USF Bridge-to-doctorate program committee, 2015 –
- USF Doctoral thesis committee member, Geology, Christopher Mehta, 2017-
- SCSU Faculty Senate, 2008-2010
- SCSU University Steering Committee on Assessment of Student Learning, 2008-2011
- SCSU College of Science and Engineering Curriculum Committee, 2005-2007
- SCSU COSE Assessment Committee, 2000-2011
- SCSU Committee on the Institution, 2006-2011

SCSU Master's thesis committee member, M.S. Electrical Engineering, S.Y. Choi,
 "Automatic modulation classification on software defined radio," 2008-2009
 SCSU Chair, search committee for department faculty positions, multiple years
 SCSU Public Observing Nights, 1997-2010
 SCSU Planetarium Shows, 1997-2010
 Workshops with High School Teachers on observing variable stars, 1999-2000, Minnesota
 SCSU Faculty advisor to students majoring in physics, radiologic technology and nuclear
 medical technology, 1994-2011
 SCSU Committee of student workers, 1997-2011
 SCSU Departmental committee of retention, promotion and tenure, 2005-2011
 SCSU Working group, Wiki-users, 2008-2010
 Faculty advisor, Penn State Erie, Women in Science and Engineering, 1994-1997
 NSF Review Panels and external reviewer, since 1993
 NASA Review Panels and external reviewer, since 1992
 Reviewer for journals Icarus and Astrophysical Journal, since 1994
 Scientific Organizing Comm., for International Astronomical Union Colloquium No.186:
 "Cometary Science after Hale-Bopp" meeting in Tenerife, Canary Islands, 2000-2002
 NASA Planetary Data Systems Small Bodies Node International Halley Watch Peer
 Review Committee, 1993
 Public lectures on astronomical topics, since 1995
 Coach, "Odyssey of the Mind" problem-solving tournament, 2012
 Astronomy Day activities with tourists on the National Mall, Washington, DC, 2013
 Public and professional outreach with social media, since 2013
 Advice and mentoring to Aspiration Creation group working with European Space
 Agency to involve African American students with Mars research, 2015.

Student Research Supervised

Students are listed according to year the work started. Also listed are the students' occupations after graduation, when known. Funds for the SCSU Observatory equipment and student wages were obtained from National Science Foundation grants. Research requirements were frequently incorporated in all upper level undergraduate astrophysics courses at SCSU; undergraduate research at USF conducted to fulfill requirements for the physics major.

1993

1. Sean McKeown, "Mm-wave Spectroscopy of Comet Swift-Tuttle" (REU student at NAU), B.S. 1994 Physics and Theology, Georgetown Univ., M.S. Physics, Northwestern University. Now I.T. Director at Oracle Corp.
2. Bret Huggard, "Optical Imaging of Collision of Comet SL9 with Jupiter," and "HST Ultraviolet spectroscopy of Interstellar Clouds." B.S. 1996, Physics and Astronomy, Northern Arizona Univ., later telescope operator and electronics technician at Kitt Peak National Observatory, Arizona.
3. Kartik Sheth, "Interstellar Optical Spectroscopy," (REU student at NAU), B.S. Grinnell College, Ph.D. Astronomy Univ. Maryland, co-supervised with B. Lutz. Now Deputy

Program Scientist at NASA.

1994

4. Brian Cudnik, "Optical Imaging of Jupiter and Mars." B.S. 1994, Physics and Astronomy, NAU, M.S. San Diego State University, 1998. Now Laboratory Specialist at Prairie View A&M University
5. Ray Graham, "CO spectra of Comet P/Schwassmann-Wachmann 1," B.S. 1997, Electrical Engineering, Penn State Erie, Engineer at Harris Corporation, Aerospace Division. Now President of Bitwise Design.

1995

6. Dennis Faith, "Imaging Comet Hale-Bopp," B.S. Biology 1997, Penn State Erie. Now physician at FirstLight Health System, Minnesota.

1996

7. Oren Ben-Bassat, "CCD Imaging of Comet Hale-Bopp," B.S. Physics, 1997, Brandeis Univ., Ph.D. Mathematics, University of Pennsylvania 2006. Later at Einstein Institute of Mathematics.
8. Javier Ruiz, "CCD Imaging of Comet Hale-Bopp", B.S. Physics, 1997, NAU.
9. Dave Suswal, "Mm-wave spectroscopy of Comet Hale-Bopp," B.S. Physics, 1997, Penn State Erie, Special Education aide, Deary High School, Deary, Idaho.
10. Steve Spencer, "Infrared Spectroscopy of Jupiter," B.S. Math, 1997, Penn State Erie, systems engineer, Aquilent.

1997

11. Chintan Modi, "CCD Imaging of Comet Hale-Bopp," B.S. Biochemistry and Molecular Biology, Penn State University. Now working at Merck Co.
12. Jack Ricotta, "CCD Imaging of Comet Hale-Bopp," B.S. Mech. Engineering, Penn State Univ., lead application developer at Progressive Insurance.
13. Scott Moore, "CCD Imaging of Comet Hale-Bopp," Environmental Science major at Penn State University, Now posting Specialist and Internet Research Assistant at Penn State Univ.
14. Aric Wiest, "Photography and CCD Imaging of Comet Hale-Bopp," B.S. Biology, 1998, Penn State Erie, M.S., Biology at Texas A&M University, 2002. Now faculty member at Univ. Missouri-Kansas City.
15. Trevor Uhl, "Mm-wave Spectroscopy of Comet Hale-Bopp," (REU student at NAU), B.S. Physics and Astronomy 1997, Yale University, Now at Investment Research & Risk

Analysis at Reliance Funds, NY.

16. Jean Zilka, "Data Reduction and Analysis of Comet Hale-Bopp," B.E.S. Physics, 1999, SCSU. Now working at DeVry Univ.
17. Frank Deglman, "CCD Imaging and Data Reduction of Comets with SCSU Observatory," B.S. Physics, 1996, SCSU. Now telescope operator and engineer at McDonald Observatory.
18. April Homich, "CCD Imaging and Analysis of Comets" and "Mm-wave Spectroscopy of Comets," B.S. Physics, SCSU, 2000, M.S. Astronomy University of Minnesota, 2003.

1998

19. Marcel Goldschen-Ohm, "Analysis of Dust Jets in Comet Hale-Bopp", "Stellar spectroscopy", in ASTR 312, B.S. physics, SCSU. Ph.D., Physics, 2009, Univ. Wisconsin-Madison, assistant scientist at UW-Madison.
20. Ahnie Jacobson, "Image Reduction of Comet Hale-Bopp", B.A. Math, 1998, College of St. Benedict, M.S. Applied and Computational Mathematics, U. of Minnesota, Duluth.
21. Mike Spinar, "Mm-wave Imaging of Comet Hale-Bopp," B.S. Meteorology, 2001, SCSU. Now graduate student in atmospheric science, University of Illinois, Urbana-Champaign
22. Brian Henning, "CCD Imaging of Comets," B.A. computer science, SCSU, 2001, senior engineer at Target.
23. Grant Aaker, "Analysis of Dust Jets in Comet Hale-Bopp," post-secondary student, B.S. Lewis and Clark College, philosophy. Currently in med school at Cornell and filmmaker.
24. Aaron Lemke, "Image Reduction of Comet Hale-Bopp Data," post-secondary student.
25. Sarah Reed, "CCD Imaging of Comets with SCSU Observatory," also in ASTR 311, B.S. Physics 2002; UC at Berkeley, Environmental Science, Policy and Management, Ph.D. 2013, postdoctoral scholar at Lawrence Hall of Science at UC-Berkeley.

1999

26. Andrea Tollison, "CCD Imaging of Comets with SCSU Observatory," in ASTR 311, B.S. Physics, SCSU. Edmund Industrial Optics, Data Systems Analyst at Mastery Charter Schools.
27. Jessica Hafner, "CCD Imaging of Comets with SCSU Observatory," undeclared, SCSU
28. Jason Cook, "CCD Imaging of Comets with SCSU Observatory," in ASTR 311, B.S. physical science education major, SCSU. Now teaching high school.
29. Steven Dorsher, "CCD Imaging of Comets with SCSU Observatory," in ASTR 311, post-secondary student, SCSU, member US TEAM 2000 Physics Olympiad. Now graduate

student in physics at Louisiana State University.

2000

30. Laura Lockwood, "Stellar Spectroscopy with SCSU Observatory," in ASTR 312, B.S. Meteorology, SCSU, 2002, now meteorologist, Director of Operations, Weatherology.
31. Corey Strom, "Variable Star Lightcurves" in ASTR 312, ASTR 323 CCD Imaging of Comets, B.S. Physics, SCSU, B&C Plumbing.
32. Andy Matt, "Stellar Spectroscopy with SCSU Observatory" in ASTR 312, computer science, SCSU
33. Kar-Yeong Teoh, "Scientific Databases on the Internet, computer maintenance," B.S. computer science, SCSU. Now at Unisys Corp.
34. Judith Peters, in ASTR 323, B.S. physics, SCSU, M.S. Mechanical Engineering SCSU, LPKB Engineering.
35. Brent Williams, in ASTR 323, B.S. physics, SCSU, Ph.D. Univ. California Berkeley, Raymond R. Tucker Distinguished assistant professor at Washington University at St. Louis.
36. Megan Broberg, in ASTR 323, B.S. earth science, SCSU, now pursuing graduate studies.
37. Pete Crandall, in ASTR 323, SCSU, "CCD Observations of Comets," B.S. physics, product manager at TE Connectivity.

2001

38. Jeff Ward, "SHINY: linux laptops and image acquisition," B.S. computer science, SCSU, 2004, Senior Software Engineer at Akamai Technologies.
39. Eric Richey, "CCD Observations of comets," computer science major, SCSU
40. Michelle Kawecki, "Observing Comets," physics major, SCSU

2003

41. Nicholas Johnson, in ASTR 311, "Planetary spectra," B.S. computer science, 2004, SCSU
42. Laura Holt in ASTR 311, "Optical images of comets," B.S. physics, 2004
43. Jesse Belschner in ASTR 311, "Optical images of comets," B.S. physics, 2004. Now a medical physicist in Minnesota.

2004

44. Kyle Nestor, "Observing Comets," B.S. aviation, 2006, SCSU, Captain, Challenger 300 at

Harley-Davidson Motor Co.

45. Matt Gesmundo, “Observing comets” in ASTR 323, physics major, SCSU, B.S. electrical engineering 2007. Project engineer at Nortech systems.
46. Sung Yeol Choi, “Computer programming and data reduction,” computer science major, SCSU, B.S. computer engineering 2006, M.S. electrical and computer engineering, 2009, SaaS developer at Isola Group.
47. Todd Stanley, “Planetary spectroscopy with the SCSU Observatory” in ASTR 323, B.S. physics, 2005, now software engineer at Hysitron.

2005

48. Joshua Swanson, “Mm-wave spectra of comet C/2001 Q4 NEAT,” in ASTR 311, B.S. physics, 2007, SCSU. Ph.D. Univ. Wisconsin-Madison, postdoctoral researcher at Brown Univ; Engineer at Intel, Oregon.
49. Dan Hessler, in ASTR 311, “Optical spectra of Mars,” ASTR 311, physics, SCSU

2006

50. Tom Pundsack in ASTR 323, “Optical spectra of comets,” B.S. physics and math, 2007, SCSU. Ph.D. physics, Univ. Minnesota 2014; Instrument Specialist, Pace Analytical.

2008

51. Andy Davies in ASTR 311, “Spectra of Hot Jupiters,” and “Extragalactic origin of Gamma Ray Bursts” in ASTR 312, B.S. physics, astrophysics track, SCSU 2011, graduate student Univ. Rochester dept of physics.
52. Brody Fuchs, “Internal energy of Io,” in ASTR 311, B.S. physics major with astrophysics track, 2010, SCSU, now graduate student in Dept Atm Science, Colorado State Univ.
53. Eric Bye, “Detecting Exoplanets,” in ASTR 311, computer science major, SCSU
54. Nishu Karna, “Diversity of Comets” in ASTR 311 and “Auroral activity and sunspots” in ASTR 312, B.S. physics, 2010, SCSU, now graduate student at George Mason Univ.

2009

55. Tim Roettger in ASTR 312, “Orbits of Binary Stars and Extrasolar Planets Learning Activity,” majoring in physics, SCSU.
56. Judd Worley in ASTR 312, “Gravitational collapse of diffuse and dense molecular clouds,” physics teaching major, SCSU.

2010

57. Shannon Escoto, “Studies of Hale-Bopp’s lightcurve,” physics major, SCSU.

58. Thomas Erdahl, “Dust and CO in comet Hale-Bopp,” M.S. in statistics, SCSU.

Note: Did not work with students while at NSF from 2011-2015**2015**

59. Kacper Wierzchos, “Millimeter-wavelength spectroscopy and optical photometry of comets,” doctoral candidate, applied physics, USF.

60. Ryan Mack, “Measuring millimeter-wavelength spectra of comet Hale-Bopp,” B.S. physics and math, USF.

2016

61. Timothy Cox, “Comet Lightcurve Project phase angle analysis,” B.S. physics, USF.

62. Isabel Rivera, “Comet Lightcurve Project phase angle analysis,” B.S. physics, USF.

63. Nathan Lastra, “Comet Lightcurve Project time series analysis,” B.S. physics, USF.

64. Anthony Curtis, “Comet Lightcurve Project time series analysis,” B.S. physics and math, USF.

2017

65. Charles Mentzer, “Comet Lightcurve Project,” B.S. physics, USF.

66. Nicholas Ruffini, “Comet Lightcurve Project,” B.S. physics, USF.

67. Olga Harrington Pinto, “Studies of CO+CO₂ in comets,” applied physics doctoral student, USF.

67. Chloe Jackson, “Comet Lightcurve Project,” physics major, USF.

2018

68. Sharlene Cruz Gonzalez, “Comet Lightcurve Project and Rotation Periods,” physics major, USF.

69. Sebastian Lende, “Comet Lightcurve Project and Rotation Periods,” physics major, Vanderbilt U.
