

RESUME OF INNA PONOMAREVA

University of South Florida

4202 E. Fowler Ave.

Physics Department, ISA 5103

Tampa, FL 33620

Phone: +1 813 9747286, Fax +1 813-9745813

E-mail: iponomar@usf.edu

Homepage: <http://shell.cas.usf.edu/~iponomar/index.html>

• Career/Employment

2013/present	Associate Professor	University of South Florida.
2009/2013	Assistant Professor	University of South Florida.
2007/2009	Research Associate Professor	University of Arkansas.
2006/2007	Research Assistant Professor	University of Arkansas.
2004/2006	Research Associate	University of Arkansas.

• Education

2004	Ph.D. in Physics	Institute of Biochemical Physics of Russian Academy of Sciences.
2001	Master of Physics	Volgograd State University, Russia.
1996	High-school graduate	Volgograd, high-school N 130, Russia.

• Grants Awarded

Single PI grants

1. 09/01/2013-08/31/2018: “*CAREER: Towards universal understanding of caloric and other complex effects in ferroics from multiscale modeling*”, National Science Foundation, DMR-1250492 (\$435,000).
2. 09/01/2013-08/31/2016: “*Complex (anti)ferroic oxides: statics and dynamics at finite temperatures*”, U.S. Department of Energy, Office of Basic Energy Sciences, Grant DE-SC0005245 (\$405,000).
3. 09/01/2011-08/31/2014: “*Terahertz Nanoscience of Multifunctional materials: Atomistic Exploration*”, Army Research Office, Department of Defense, Contract 57787-EL (\$412,756).
4. 09/01/2010-08/31/2013: “*Atomistic Study of Ultrafast Dynamics in Multifunctional Materials in Bulk and Nanoforms*”, U.S. Department of Energy, Office of Basic Energy Sciences, Grant DE-SC0005245 (\$405,000).

- **Publications and Citation Metrics**

As of 09/11/2013 from Web of Knowledge database

Total number of peer-reviewed publications: 50

Total citation index: 1027

Average citation per article: 21

h-index: 18

- **Teaching and Outreach**

Graduate level courses: Computational Nanoscience (2008), Computational Physics I (2009-2013). Students evaluation score from the last semester is 4.9/5.0.

Undergraduate level courses: Mathematical Methods in Physics (2009-2013). Students evaluation score from the last semester is 4.3/5.0.

PostDocs, graduate, undergraduate students, and other advising: Three PostDocs, four graduate students, four undergraduate students, and one high-school student. One PhD and one Master degree in Applied Physics awarded to the advisees.

Outreach: Developer and coordinator for an outreach program targeting middle school students (<http://shell.cas.usf.edu/~iponomar/outreach.html>). The program is recognized by NSF CAREER award.

- **Research Synopsis and Professional Expertise**

Research Fields: Computational condensed matter physics and nanoscience, numerical quantum chemistry, computational techniques development and implementation;

Areas of expertise: semiconductors, complex ferroics, multiferroics and antiferroics, low-dimensional structures;

Research interests: static and dynamic properties of ferroics at finite temperatures and at the nanoscale, phase transitions, mechanics at the nanoscale, flexoelectricity, caloric effects, predictive modeling, high-performance computing;

Computational techniques: *Ab initio* density-functional-theory based methods, Classical and Quantum-mechanical Molecular Dynamics, classical Monte Carlo, empirical potentials, tight-binding electronic structure methods and Molecular Dynamics, effective Hamiltonian techniques.

Professional expertise: Reviewer for Physical Review Letters, Physical Review B, Computational Materials Science, Journal of Applied Physics, Physica E, Applied Physics Letters, European Physical Journal Plus, and Physica Status Solidi. Reviewer for National Science Foundation, U.S. Department of State, U.S. Department of Energy.

- **U.S. patents**

“Asymmetric dipolar rings”, Patent number 7,835,168.

- **Most significant works**

1. B. K. Mani, C.-M. Chang, and I. Ponomareva, “Atomistic study of soft-mode dynamics in PbTiO₃”, Phys. Rev. B **88**, 064306 (2013).

2. S. Lisenkov, B. K. Mani, C.-M. Chang, J. Almand, and I. Ponomareva , “Multicaloric effect in ferroelectric PbTiO₃ from first principles ”, Phys. Rev. B **87**, 224101 (2013).
3. I. Ponomareva and S. Lisenkov, “Bridging the Macroscopic and Atomistic Descriptions of the Electrocaloric Effect”, Phys. Rev. Lett. **108**, 167604 (2012).
4. Kevin McCash, A. Srikanth, and I. Ponomareva, “Competing polarization reversal mechanisms in ferroelectric nanowires”, Phys. Rev. B **86**, 214108 (2012).
5. I. Ponomareva and S. Lisenkov, “Giant elastocaloric effect in ferroelectric Ba_{0.5}Sr_{0.5}TiO₃ alloys from first-principles”, Phys. Rev. B **86**, 104103 (2012).
6. I. Ponomareva, A. Tagantsev, and L. Bellaiche, “Finite-temperature flexoelectricity in ferroelectric thin films from first principles”, Phys. Rev. B. **85**, 104101 (2012).
7. Qingteng Zhang, R. Herchig and I. Ponomareva, “Nanodynamics of Ferroelectric Ultrathin Films”, Phys. Rev. Lett. **107**, 177601 (2011).
8. Qingteng Zhang and I. Ponomareva “Microscopic insight into temperature-graded ferroelectrics”, Phys. Rev. Lett. **105**, 147602 (2010).
9. S. Lisenkov and I. Ponomareva, “Intrinsic electrocaloric effect in ferroelectric alloys from atomistic simulations”, Phys. Rev. B., Rapid Com. **80**, 140102(R) (2009).
10. H. Bea, B. Dupe, S. Fusil, R. Mattana, E. Jacquet, B. Warot-Fonrose, F. Wilhelm, A. Rogalev, S. Petit, V. Cros, A. Anane, F. Petroff, K. Bouzehouane, G. Geneste, B. Dkhil, S. Lisenkov, I. Ponomareva, L. Bellaiche, M. Bibes, and A. Barthélémy, “A room-temperature multiferroic with a giant axial ratio”, Phys. Rev. Lett. **102**, 217603, (2009).
11. I. Ponomareva and L. Bellaiche, “Nature of dynamical coupling between polarization and strain in nanoscale ferroelectrics from first principles ”, Phys. Rev. Lett. **101**, 197602 (2008).
12. J. Hlinka, T. Ostapchuk, D. Nuzhnny, J. Petzelt, P. Kuzel, C. Kadlec, P. Vanek, I. Ponomareva, L. Bellaiche, “Coexistence of the relaxation and soft modes in the terahertz dielectric response of tetragonal BaTiO₃ ”, Phys. Rev. Lett. **101**, 167402 (2008).
13. S. Prosandeev, I. Ponomareva, I. Kornev, and L. Bellaiche, “ Control of Vortices by Homogeneous Fields in Asymmetric Ferroelectric and Ferromagnetic Rings”, Phys. Rev. Lett. **100**, 047201 (2008).
14. I. Ponomareva, L. Bellaiche, T. Ostapchuk, J. Hlinka and J. Petzelt, “Terahertz dielectric response of cubic BaTiO₃”, Phys. Rev. B **77**, 012102 (2008).
